

David Grigoryan

Location: Central Israel

Full-Stack Developer (React.js / Node.js / FastAPI)

Phone: 052-40-56-076

LinkedIn: <https://linkedin.com/in/david-fullstack-co>

Email: davoaleks1991@gmail.com

Languages: Hebrew(fluent), English(good), Russian, Armenian

Full-Stack Developer building web and mobile applications, integrating LLMs and RAG, deploying scalable systems

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python, Java, HTML, CSS

Databases & ORMs: MySQL, PostgreSQL, SQLite, MongoDB, Redis, Qdrant, / Sequelize, Prisma, Mongoose

Skills & Methodologies: OOP, Functional Programming, Microservices Architecture, AI systems with embeddings and vector similarity search Retrieval-Augmented Generation (RAG), Single Page Applications (SPA), CSR/SSR hybrid rendering, Asynchronous Programming, Event Loop Architecture, Multithreading, Real-Time Communication, Caching Strategies, Scalable System Design, System Architecture, Performance Optimization, API Design

Technologies: React, Redux, Redux Toolkit (RTK), Next.js, Node.js, Express.js, FastAPI, React Native, Tailwind CSS, Jest and Supertest, Sentence-Transformers, Leaflet, Ollama, OpenAI, REST APIs, GraphQL, JSON, WebSockets, Socket.IO, Kafka, RabbitMQ, JWT Authentication, OAuth2, HTTPS, TCP/IP, UDP, WebRTC.

Tools / Cloud: Linux, Nginx, npm, npx, Expo, Uvicorn, Vite, Postman, GitHub, Docker, AWS, CI/CD pipelines

Professional Experience

2024 – Present — Full-Stack Developer | Inetex Ltd. (Rehovot, Israel)

Project: Electric Vehicle Charging Station Management System – Developed a real-time monitoring dashboard to monitor charging station availability, operational status, and system performance across multiple charging station locations in real-time environments. Built scalable backend services for real-time data processing and monitoring. Designed a high-availability infrastructure supporting reliable system performance and scalable deployment.

Used: React, Next, WebSockets, Node.js, PostgreSQL, Redis, REST APIs, Leaflet, JWT, AWS, Docker, Git Actions

Project: Admin Panel for an Investment Company – Developed a full-stack platform for managing investment operations, client data, and internal workflows through a secure administrative dashboard. Built scalable backend services supporting secure data processing, role-based access control, and authentication for different user roles. Integrated an AI-powered assistant for intelligent document search and contextual responses. Optimized backend workflows and database performance to support highly scalable, reliable, enterprise-grade system operations.

Used: React, Redux, Vite, Express.js, FastAPI, MySQL, MongoDB, JWT, RBAC, RAG, Embeddings, Vector Search

2021 – 2024 — Full-Stack Developer | CyberSync LLC (Yerevan, Armenia | Remote)

Project: Construction & Real-Estate Sales Platform & Admin Panel – Developed a real estate sales platform and admin panel using Next.js, Tailwind CSS, Node.js, Express.js, and MongoDB. Implemented REST APIs, user authentication, and role-based access control (RBAC), ensuring secure and scalable application architecture.

Project: Online Taxi & Admin Panel – Developed a mobile taxi booking application and admin dashboard using React Native (Expo) and React, with FastAPI, *MySQL*, *Redis*. Developed scalable real-time ride tracking and booking features using WebSockets, push notifications, and optimized performance for high-availability systems.

2018 – 2019 — Data Analysis | A.R.G.E Business LLC , (Yerevan, Armenia)

Worked with a sales and logistics ERP system. Executed SQL queries to retrieve and update data for analytics and reporting. Supported sales managers using handheld devices connected to the company's SQL database.

Education

2014 – 2017 Bachelor's Degree in Computer Science in Economics

Strategy, probability theory, statistics, algorithms, data structures, linear algebra, and software engineering, with a strong foundation in data analytics and quantitative decision-making. — Northern University

2020 - 2021 Full-Stack Developer

Program. Practical training in React, Redux, Node.js, Java Spring, SQL, NoSQL, Docker, and AWS. Built full-stack web and mobile applications and tested them using Jest and Supertest using REST APIs and Git.
