

David Grigoryan

Location: Central Israel

Full-Stack Developer (React / Node.js / FastAPI)

Phone: 052-40-56-076

Email: davoaleks1991@gmail.com

LinkedIn: <https://linkedin.com/in/david-fullstack-co>

Languages: Hebrew(fluent), English(good), Russian, Armenian

Technical Skills

Architecture: app.diagrams.net, System Design, Microservices, REST API Design, Clean Architecture, SOLID.

Frontend: JavaScript, TypeScript, React, Redux Toolkit, Next.js, React Native, Vite, Tailwind CSS, HTML5, CSS3.

Backend/Security: Node.js, Python, NestJS, Express, FastAPI / (JWT, OAuth2), Data Encryption, Rate Limiting.

Communication/Databases: REST API, WebSocket, GraphQL / SQL, NoSQL, Vector Databases.

Testing: Jest, Supertest, React Testing Library, Unit Testing, Integration Testing, E2E Testing.

AI: OpenAI, OpenRouter, Ollama/vLLM, Runway, Prompt Engineering, RAG, Embeddings, LLM Integration.

Tools & DevOps: VS Code, Cursor, AI agents, Git, GitHub, CI/CD, Docker, Linux, Nginx, AWS, Vercel.

Professional Experience

2024 – Present — Full-Stack Developer | Inetex Ltd. (Rehovot, Israel)

Project: Marketplace Platform – Developed an AI marketplace platform where users can create posts and use an AI-powered RAG search assistant connected to the database. Implemented AI video generation, AI-powered admin moderation for post reliability and safety, and an AI helper for creating posts without errors. Built cost-aware infrastructure with optimized pricing for LLM usage, media processing, and AI video generation. Added authentication.

Used: Next.js, Node.js, NestJS, FastAPI, Express, WebSockets, Pigeon Maps, PostgreSQL, Prisma, Embeddings, Redis, Qdrant, REST APIs, WebSocket, Bcryptjs, Twilio, Resend, JWT, AWS, Vercel, OpenRouter, Runway.

Project: Electric Vehicle Charging Station Management System – Built a real-time dashboard with a responsive UI to track charging station availability, status, and performance. Implemented real-time updates and scalable backend services for data processing. Added JWT authentication and designed a scalable and reliable infrastructure.

Used: React, Next.js, WebSockets, Node.js, PostgreSQL, Redis, REST APIs, Leaflet, JWT, AWS, Docker, Git Actions

Project: Admin Panel for Investment Company – Built a full-stack admin dashboard for managing investments, clients, and workflows. Implemented secure backend with role-based access control and authentication. Integrated an AI assistant for document search and responses. Optimized backend and database performance for scalability.

Used: React, Redux, Vite, Express.js, FastAPI, MySQL, MongoDB, JWT, RBAC, RAG, Embeddings, Vector Search.

2021 – 2024 — Full-Stack Developer | CyberSync LLC (Yerevan, Armenia | Remote)

Project: Construction & Real Estate Sales Platform & Admin Panel – Developed a platform for managing real estate sales and interactions through a web application and administrative dashboard to view available houses.

Used: Next.js, Tailwind CSS, Responsive UI, Node.js, Express.js, MongoDB, REST APIs, JWT, RBAC

Project: Online Taxi & Admin Panel – Developed full-stack taxi platform with mobile app, admin dashboard, real-time tracking, WebSockets, notifications, scalable backend with high availability, performance, and efficient data processing

Used: React Native (Expo), React, FastAPI, MySQL, Redis, WebSockets, Push Notifications

2018 – 2019 — Data Analysis | A.R.G.E Business LLC, (Yerevan, Armenia)

Worked with a sales and logistics ERP system. Executed SQL queries to retrieve and update data for analytics and reporting. Supported sales managers using handheld devices connected to the company's SQL database.

Education

2014 – 2017 Bachelor's Degree in Computer Science in Economics

Strategy, probability theory, statistics, algorithms, data structures, linear algebra, and software engineering, with a strong foundation in data analytics and quantitative decision-making. — Northern University

2020 - 2021 Full-Stack Developer Program. Practical training in React, Redux, Node.js, Java Spring, SQL, NoSQL, Docker, and AWS. Built full-stack web and mobile applications and tested them using Jest and Supertest using REST APIs and Git.
